

THE INVISIBLE THREAT OF INTESTINAL PARASITES

ROUNDWORMS

THE THREAT IS REAL

Hookworms and roundworms are the most prevalent intestinal nematode parasites* of dogs in the U.S.³ That also means they're more prevalent than whipworms and tapeworms.³

*GI nematodes only.

HOOKWORMS

EVEN YOU ARE AT RISK

Hookworms and roundworms can be easily transmitted to humans. Almost **73% of U.S. pediatricians** reported a **parasitic infection in children** in a survey performed in 2002.⁴

HEARTGARD Plus

CHOOSE TRUSTED PROTECTION

HEARTGARD[®] Plus (ivermectin/pyrantel) is the #1 dog-preferred real-beef chew that prevents heartworm disease as well as treats and controls 2 species of roundworms and 3 species of hookworms.⁵ For dog use only.

IMPORTANT SAFETY INFORMATION: HEARTGARD Plus is well tolerated. All dogs should be tested for heartworm infection before starting a preventive program. Following the use of HEARTGARD Plus, digestive and neurological side effects have rarely been reported. For more information or for the full prescribing information, talk to your vet, call 888-637-4251, or visit HEARTGARD.com.
